PVC pressure pipes for conveying water, irrigation and industrial applications.

## COMPANY

LARETER Spa is a Company founded in 1961 that has been operating for more than 50 years in the production of PVC and HDPE pipes, used for industrial applications, for the construction of pipelines for water supply, drainage and wastewater and in agriculture for irrigation.

With the acquisition of Plastiform SRL in 2008, LARETER has expanded its know-how into the production of PVC and HDPE fittings having an entire production department, producing standard fittings or special ones according to drawings of the customers and manufacturing thermoplastic items through a process of both injection and thermo-moulding. The seriousness and reliability of Lareter are furthermore confirmed by the wide case History of application of its products in different projects, coming from leading Companies both in Italy and foreign countries, working in the field of water treatment, constructions, cooling processes, biogas and drains.

LARETER is appreciated within the sector, due to its engagement, service and reliability in handling the commitments. Thanks to its stocks in the warehouse, delivery terms of maximum 7 to 10 days from date of order are guaranteed within Europe.

LARETER currently distributes its products in more than 30 countries all over the world. Thanks to a well established commercial network and a well organised logistic department, Lareter is able to respond quickly to customer's requests.

In June 2014 LARETER Group, a leading producer of PVC – HDPE pipes, acquired FIMAP, a company that operates in the production of material for wells, drainage, geothermal and consolidations, constituting a newco, Fimap Technologies, with the aim of consolidating and implementing the results achieved, proposing Fimap as a reference point on the market.
